Executive Summary of 2003 Results

DSTP Science & Social Studies, Grades 4 & 6

The results from the fourth administration of the grades 4 and 6 Science and Social Studies portions of the Delaware Student Testing Program (DSTP) are part of a long-term effort to gather data on our students' educational progress and to use the data to inform our decisions about instruction. Studied over time, the data will help identify trends and patterns that can be directly related to curriculum and instruction, giving districts and schools additional decision-making tools. Science and Social Studies data for grades 4 and 6 are summarized in this document. The data include summaries of test scores and participation. Science and social studies data for grades 8 and 11 are published a separate document.

DSTP results are summarized at three levels: the state level, the district level and the school level. This executive summary contains the state level results. The two accompanying summaries are the district level results and the school level results. If a district or a school has fewer than 15 students in a given category (the Standards-Based Score N is less than 15), the number of students is reported, but the summary statistics associated with those students are not. Students are included in the Standards-Based Score N if their score is considered to be aggregable¹. In contrast, the Tested N includes all students, regardless of whether their scores are aggregable or non-aggregable. Therefore, the Standards-Based Score N will often not be equal to the Tested N.

The science and social studies data are reported as Standards-Based Scores (SBSs) and Performance Levels (PLs). The SBSs measure students' progress toward Delaware standards in each content area. The SBSs in science and social studies come from items developed in Delaware. They are reported on a scale that runs from approximately 100 to 500.

PLs tell how students are performing relative to the state's content standards. Delaware has five performance levels as indicated on the following page.

¹ See the *Delaware Student Testing Program Guidelines for Inclusion of Students with Disabilities and Students With Limited English Proficiency* for a definition of aggregable and non-aggregable scores.

DSTP Student Performance Levels

The student performance levels and cut scores were established by educators and community members from around the state and were approved by the State Board of Education on February 21, 2001.

Table 1 DSTP Student Performance Levels		
Level	Category	Description
5	Distinguished	Excellent performance
4	Exceeds the Standard	Very good performance
3	Meets the Standard	Good performance
2	Below the Standard	Needs improvement
1	Well Below the Standard	Needs significant improvement

Cut Scores for the DSTP Assessment

The cut scores for DSTP Science appear in Table 2. The indicated numbers represent the lowest possible scores a student can earn and still be within the indicated performance level.

Table 2 Cut Scores: DSTP Science Assessment				
Grade	Below	Meets	Exceeds	Distinguished
4	286	300	325	336
6	285	300	325	335

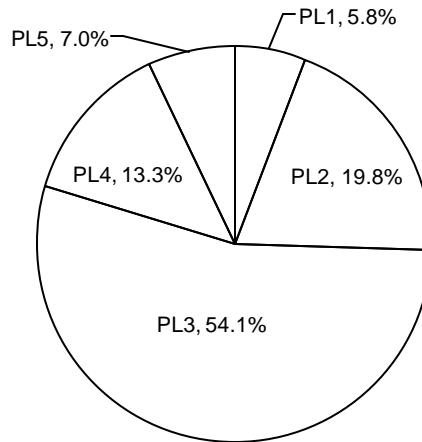

Table 3 contains similar information for Social Studies. The indicated numbers represent the lowest possible scores a student can earn and still be within the indicated performance level.

Participation Rates

A goal of the DSTP is to have as many as possible of Delaware's public school students at each test grade participate. To achieve this goal, participation guidelines for students with disabilities and limited English proficient (LEP) students, and procedures for granting special exemptions and invalidations have been established by the DOE.

Eligible N. All students enrolled in a public school are eligible to take the DSTP unless they participate in the Delaware Alternative Portfolio (DAPA) or they were granted a Special Exemption. It is the sum of "Tested N" and "Not Tested N."

Exempt N. Some students were granted a special exemption from the DSTP due to physical or mental conditions or reasons of an emergency nature, such as death of a family member, accident, hospitalization, etc. Special exemptions or invalidations were also granted for students who were unable to complete all or part of the test due to conditions beyond the student's control that developed during the weeks of testing. These students are counted in the "Exempt N" column. Students with limited English proficiency who had been in Delaware schools for fewer than 12 months and received a valid DSTP exemption accommodation were also included in "Exempt N."

Tested N. "Tested N" is the number of students who took the DSTP. Invalidations may have resulted due to behavior caused by the student such as cheating, disruptive behavior, refusal to test, etc. This type of invalidation resulted in a performance level 1 for the content area(s) affected and the student is counted in the "Tested N" column.

Not Tested N. Students are counted in the "Not Tested" column if they are eligible to take the DSTP but are absent during the entire test week and the make-up week that follows.

% Tested. The percent tested is calculated by dividing "Tested N" by "Eligible N."

% Not Tested. The percent tested is calculated by dividing "Not Tested N" by "Eligible N."
